

It is important for people with a chronic disease to take their medication daily.

Unfortunately, many medications are costly.

The cost can cause people to take only half of their recommended dose or stop taking the medication.

The Prescription Assistance Program was created to help people obtain prescription medications when cost is an issue.

**Prescription Assistance
Program**

How the Program Works

- When you contact our office, a staff member will ask you a few questions to determine if you qualify for the program and what medications you will need.
- If you qualify, a staff member will help you fill out forms for the patient assistance programs offered by the pharmaceutical companies.
- These patient assistance programs will supply you with the medications at low or no cost to you.
- Our staff will help you reapply when your enrollment is close to expiring.

Our staff will help you every step of the way.

Who Qualifies?

- Anyone with a valid prescription written by a medical provider overseeing your care
- Anyone who meets the income requirements of the medication's maker (the pharmaceutical company)

Assistance is available for the following chronic diseases:

Asthma/Allergy/Lung
Diabetes
Endocrine
Heart, Cholesterol and Stroke
Hypertension
Others

** Not including schedule drugs*
